AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): An electrical cable comprising:

- a) a plurality of spaced, parallel flat conductors and
- b) at least one web of dielectric material, wherein said web of dielectric material ~~has been~~ is unstretched to in regions containing held said conductors in said spaced, parallel relationship and said web of dielectric material is stretched in regions not containing said conductors to hold said conductors in said spaced, parallel relationship.

Claim 2 (original): The electrical cable of Claim 1, wherein said conductors are metal.

Claim 3 (canceled)

Claim 4 (original): The electrical cable of Claim 1, wherein said dielectric material comprises a polymer.

Claim 5 (original): The electrical cable of Claim 1, wherein said dielectric material comprises a nonwoven.

Claim 6 (previously presented): The electrical cable of Claim 1, wherein said dielectric material comprises polytetrafluoroethylene.

Claim 7 (previously presented): The electrical cable of Claim 1, wherein said dielectric material comprises expanded polytetrafluoroethylene.

Claim 8 (original): The electrical cable of Claim 1, wherein said dielectric material comprises microporous film.

Claim 9 (withdrawn): A method for making an electrical cable having a plurality of spaced, parallel flat conductors comprising the steps of:

Customer No. 27752

- (a) providing first and second web of dielectric materials;
- (b) providing a third sheet of conductive material;
- (c) bonding said first and second web materials to said third sheet of conductive material in a face-to-face layered relationship thereby forming a bonded laminate; and
- (d) incrementally stretching said bonded laminate to form a plurality of spaced, parallel flat conductors.

Claim 10 (withdrawn): The method of Claim 9, wherein said conductor comprises a metal sheet.

Claim 11 (withdrawn): The method of Claim 9, wherein said conductor comprises a metal foil.

Claim 12 (withdrawn): The method of Claim 9, wherein said dielectric material comprises a nonwoven.

Claim 13 (withdrawn): The method of Claim 9, wherein said dielectric material comprises a polymer film.

Claim 14 (withdrawn): The method of Claim 9, wherein said dielectric material comprises PTFE.

Claim 15 (withdrawn): The method of Claim 9, wherein said dielectric material comprises expanded PTFE.

Claim 16 (withdrawn): The method of Claim 9, wherein said dielectric material comprises expanded microporous film.

Claim 17 (canceled)
